**DETAILED ACTIONS**

**EXAMINER'S AMENDMENT**

1. Applicant's election of claims 1-14, 21 is acknowledged. Because Applicant did not distinctly and specifically point out the supposed error in the restriction requirement,

the election has been treated as an election without traverse (MPEP § 818.03(a)).

**Applicant have the right to file a divisional application covering the subject matter of the non-elected claims 15-20.**

The traversal is on the ground(s) that see the election paper. This is not found persuasive because the fields of search for method' and device claims are NOT coextensive and the determinations of patentability of method and device claims are different, that is process limitations and device limitations are given weight differently in determining the patentability of the claimed inventions. Also, the strategies for doing text searching of the device claims and method claims are different. Thus, separate searches are required.

The requirement is still deemed proper and is therefore made FINAL.

2. An examiner's amendment to the record appears below. Should the change and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

**Cancel claims 15-20.**

Claim 12 (currently amended), page 8, line 2, "said first layer in said opening" should be --said first **conductive** layer in said opening--

**REASONS FOR ALLOWANCE**

3. Claims 1-13, 21 are allowed.
4. The following is an examiner's statement of reasons for allowance: None of the references of record teaches or suggests a cited in claims 1, 12: a first conductive layer including one or more materials selected from the group consisting of metal and compounds of metals, said first conductive layer separated from a transistor channel region by a thickness of a gate dielectric; and an overlying conductive silicide layer overlying said first conductive layer (as cited in claim 1); forming a first conductive layer in said opening including at least one material selected from the group consisting of metals and compounds of metals; depositing a layer of silicon on said first conductive layer in said opening; removing said dielectric layer and forming a second metal layer including a silicide-forming metal over said source region and said drain region and said layer of silicon; and annealing said substrate to form a silicide from said silicide-forming metal, said silicide contacting said source region and said drain region and contacting said layer of silicon (as cited in claim 12).
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### CONCLUSION

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Kim (6,534,352 B1): Method for Fabricating a MOSFET Device.
